| JOYA FOR BARNEY'S SCENTS

We love things, places, and people that smell nice, so naturally fragrance diffusers are inherently a good thing. However, unfortunately much of the time the vessels themselves, that carry the precious fragrance, can look cheap and tacky.

Enter the Joya X Barneys diffuser. For this collection, Joya founder Frederick Bouchardy selects vintage vessels, ranging from late 1800's English ink pots to early 1900's medical and amber boudoir bottles, and packages them with classic French apothecary-inspired perfume oils for a one-of-a-kind home fragrance experience.

The set includes ten natural reed sticks, funnel, card with a description of the specific item, and with an attractive wooden box.
