

Solid Perfume + Jewelry

*She followed slowly, taking a long time,
though something hadn't yet been summoned
and yet as if, as soon as she was just it,
she would no longer walk, but fly.*

Myth

*The sun sets over a primeval forest, slants of fading
light shimmering through the uppermost leaves of canopy trees.
The air is infused with the nightingales' melancholy song.*

*A solitary huntress emerges from the sheer mist and discovers a wounded human
prince, bitten by an enchanted spider. He cannot survive with otherworldly
venom coursing through his mortal veins. The huntress, intoxicated by his
beauty and fragility, decides to save the prince and transform herself forever.*

*In the waning twilight, she sacrifices the source of her immortality for
a restorative elixir. To ensure its protective powers, the huntress
captures her essence in a relic to be worn for all time.*

*This Vane & Joya collaboration captures romance and ritual
throughout the ages, blending mythic amulets with
fragrances evoking classic aphrodisia.*

*Honoring the timeless process of craftsmanship and the eternal
energy of New York City, perfumes are blended in Brooklyn
with a natural base of jojoba and carnuba oil.*
